

# Gjorgi Panev

## Summary

QA Engineer with 3+ years of experience in manual and automated testing. Experienced in API & UI automation and CI/CD integration. Currently enhancing front-end and web design skills to bridge quality assurance with user experience and modern web development.

## Education

### **Bachelor of Engineering, FCSE-UKIM, Skopje**

September 2017 - June 2021

### **Front-end Engineer, Avenga Academy**

October 2024 - July 2025

### **Web Design & UX/UI Fundamentals, Avenga Academy**

October 2024 - July 2025

### **Playwright Course, Avenga Academy**

October 2024 - November 2024

## Work Experience

### **QA Engineer, Polar Cape, Skopje**

May 2022 - May 2024

- Created and ran detailed test plans and test cases to make sure everything worked as expected.
- Worked on both manual and automated testing to catch bugs and improve overall performance.
- Logged and tracked bugs using tools like JIRA, Azure DevOps helping the team prioritize and fix issues quickly.
- Took part in Agile sprints, regularly sharing feedback to improve features and user experience, worked closely with developers and product managers.

### **Freelance QA Engineer**

September 2024 - April 2025

- Performed manual testing of multiple web applications, covering functional, regression, exploratory, and usability testing.
- Designed and executed test cases and test scenarios based on client requirements and acceptance criteria.

### **SDET Internship, It Labs, Skopje**

June 2025 - September 2025

- Applied foundational testing methodologies to design and execute automated test cases aligned with business and technical requirements.
- Collaborated with developers, product managers, and designers to clarify acceptance criteria and validate user scenarios, including edge cases.
- Designed and maintained automated test scripts using Python (Pytest, Requests) for API automation and Playwright with TypeScript for UI automation.
- Developed a Page Object Model (POM) framework.

## Languages

Macedonian

English

Spanish

Serbian

- Implemented data-driven testing to increase test coverage and reduce duplication across test suites.
- Integrated automated tests into CI/CD pipelines (Azure DevOps) with Allure reporting for visibility of results.
- Logged, tracked, and verified defects systematically, performing root cause analysis and retesting fixes.
- Created and maintained test documentation: test cases, bug reports, user stories, and tasks in Azure DevOps.

## Technical Skills

- Software Testing: Strong knowledge and hands-on experience in software testing techniques, test case design, and defect management.
- API Testing: Experienced in both manual and automated API testing using Postman, Swagger, and Python frameworks (Pytest, Requests).
- UI Test Automation: Skilled in Playwright and Selenium for end-to-end testing and browser automation.
- Performance Testing: Familiar with JMeter for load and performance testing, analyzing system behavior under varying workloads and identifying bottlenecks.
- Test Management Tools: Proficient with Jira, Azure DevOps, and TestRail for test planning, execution, and reporting.
- Databases: Practical experience with SQL Server Management Studio and MySQL Workbench for data validation and query testing.
- Programming & Scripting: Knowledge of Python, JavaScript, and TypeScript for building and maintaining test automation frameworks.
- Front-End & Web Development: Familiar with HTML5, CSS3, JavaScript, Bootstrap, React and WordPress – combining QA precision with UI/UX awareness.
- Design & Prototyping: Experience working with Figma for web design, layout composition, wireframing, and interactive prototyping, applying usability and accessibility principles.
- Methodologies: Experience working in Agile/Scrum environments, collaborating closely with developers, designers, and product teams.
- CI/CD Integration: Experience integrating automated tests into GitLab and Azure DevOps pipelines for continuous testing and reporting.
- Reporting: Familiar with Allure Reports and test result visualization.
